Balancing the opposing forces of Low Cost vs High Quality: Capital Music Center has created an extra special rental program to allow students to access the quality of piano that piano teachers feel most comfortable with for a low monthly cost. Contrary to parents' initial thoughts, lower quality instruments statistically contribute to a higher dropout rate. On the other hand, the investment in a quality piano that has a proper piano touch and sound is one that will encourage your child to practice and allow your child to grow into instead of out of. The pianos listed below are teacher preferred and teacher approved, have no minimum rental period, and at anytime within the first 6 months you may apply 100% of first 6 months of rent toward ANY piano we sell that is \$499 or greater.
